

### **Information on transmission of results**

- Please save the result form as pdf on your computer, before using it. It is not recommended to fill in the form in the internet browser.
- Please note: Only numeric results or <-values can be considered and included in the final report.
- Use the given units and report the values\* accurately to 2 %, i.e. with at least two digits, if the leading digit is greater than or equal to 5 (e.g. 51 µg/L, 6.2 µg/L, 0.89 µg/L), otherwise with at least three digits (e.g. 10.2 µg/L, 3.23 µg/L, 478 µg/L). Please note that if you specify a result with an insufficient number of digits, the result cannot be included in the evaluation. (see E DIN ISO 13528, item 5.5.4.2); If your instrument for analysis does not provide the required number of digits, it is necessary to specify the measurement uncertainty, adapted to the situation.
- Reporting of measurement uncertainty: In the column "uncertainty ±" you assign an interval in the given concentration units to your result, which due to your information includes the "true value".
- The applied analytical method\* must be selected in the relevant form field.
- Please sign the form and send it to the IFA-Tulln, either by fax or scanned and by e-mail. Faxing often interferes with the readability of the results. We therefore ask you to complete the form electronically.
- The target values are published shortly after the deadline (**04 December 2020**) on the Internet ([www.ifatest.eu](http://www.ifatest.eu)). We will not process any results submitted afterwards.

**Closing date: 04 December 2020**

Sample Parameter	M154A		M154B		Unit	Date of Analysis	Method
	Result	Uncertainty ± µg/l	Result	Uncertainty ± µg/l			
Aluminium					µg/L		
Arsenic					µg/L		
Lead					µg/L		
Cadmium					µg/L		
Chromium					µg/L		
Iron					µg/L		
Copper					µg/L		
Manganese					µg/L		
Nickel					µg/L		
Mercury					µg/L		
Selenium					µg/L		
Uranium					µg/L		
Zinc					µg/L
