

### ***Information on transmission of results***

- Please save the result form as pdf on your computer, before using it. It is not recommended to fill in the form in the internet browser.
- Please note: Only numeric results or < -values can be considered and included in the final report.
- Use the given units and report the values\* accurately to 2 %, i.e. with at least two digits, if the leading digit is greater than or equal to 5 (e.g. 51 mg/L, 6.2 µg/L, 0.89 mmol/L), otherwise with at least three digits (e.g. 10.2 mg/L, 3.23 µg/L, 478 µS/cm). Please note that if you specify a result with an insufficient number of digits, the result cannot be included in the evaluation (see E DIN ISO 13528, item 5.5.4.2). If your instrument for analysis does not provide the required number of digits, it is necessary to specify the measurement uncertainty, adapted to the situation.
- Reporting of measurement uncertainty: In the column "uncertainty ±" you assign an interval in the given concentration units to your result, which due to your information includes the "true value".
- The applied analytical method\* must be selected in the relevant form field.
- Please sign the form and send it to the IFA-Tulln, either by fax or scanned and by e-mail. Faxing often interferes with the readability of the results. We therefore ask you to complete the form electronically.
- The target values are published shortly after the deadline (**17 June 2022**) on the Internet ([www.ifatest.eu](http://www.ifatest.eu)). We will not process any results submitted afterwards.

**Closing date: 17 June 2022**

Temperature arrival of samples [°C]	Date of analysis:
-------------------------------------	-------------------

Sample Parameter	N162A		N162B		Unit	Date of Analysis	Method
	Result	Uncertainty ±	Result	Uncertainty ±			
pH							
el. Conductivity (25°C)					µS/cm		
total Hardness					mmol/L		
Alkalinity $K_{S,4.3}$ (as $H^+$ )					mmol/L		
Hydrogen carbonate					mg/L		
Calcium					mg/L		
Magnesium					mg/L		
Sodium					mg/L		
Potassium					mg/L		
Nitrate (as $NO_3^-$ )					mg/L		
Nitrite (as $NO_2^-$ )					mg/L		
Ammonium (as $NH_4^+$ )					mg/L		
Chloride					mg/L		
Sulfate (as $SO_4^{2-}$ )					mg/L		
Orthophosphate (als $PO_4^{3-}$ )					mg/L		
Boron					mg/L		
DOC (as C)					mg/L		
total-P (as $PO_4^{3-}$ )					mg/L		
Permanganate index (as $O_2$ )					mg/L
